

B. RAVI SHANKAR

Chennai, India | Open to Relocate | [+91 91500 55448](tel:+919150055448) | ravishankarx2005@gmail.com | [LinkedIn](#) | [GitHub](#) | [applivo.in](#)

SUMMARY

Pre-final year B.Tech CSE (AI & ML) at SRMIST (CGPA 8.21/10, YOP 2027). Proficient in Python, FastAPI, and REST API design with hands-on experience building and deploying production-grade backend services. Shipped a live agentic AI platform ([applivo.in](#)) using FastAPI, Docker, and LLM APIs. Top 1% nationally in Amazon ML Challenge 2024 (Rank 62/6,223).

SKILLS

Languages: Python (primary), TypeScript, C, C++, SQL
Backend & APIs: FastAPI, Flask, REST API Design, Async I/O, Pydantic, JWT Auth, CRUD Architecture
Databases: MongoDB, PostgreSQL, MySQL, NoSQL Data Modeling
Gen AI & ML: LLM APIs (OpenAI, Claude), LangChain, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy
DevOps & Tools: Docker, Git, Linux, pytest, Postman, Jupyter Notebook
Practices: Clean Code, Modular Architecture, Code Reviews, Scrum/Agile, Technical Documentation

EXPERIENCE

Linux System Development Intern Jan 2026 – March 2026
C-DAC (Centre for Development of Advanced Computing) Chennai, India
– Built and tested system-level utilities in C and shell scripting following government-grade software engineering standards and structured development lifecycle practices.
– Wrote technical documentation for system modules and contributed to internal tooling; participated in team code reviews and collaborative debugging sessions.

Machine Learning Intern Dec 2024 – Jan 2025
Prodigy InfoTech Remote
– Developed end-to-end supervised ML pipelines in Python on 10,000+ records using Pandas and Scikit-learn; automated preprocessing steps reducing runtime by ~40%.
– Wrote modular, well-documented pipeline code; evaluated models with cross-validation, confusion matrices, and per-class F1 across iterative sprint cycles.

PROJECTS

Applivo – AI Orchestration Platform | *Python, FastAPI, Docker, Async I/O, OpenAI API, Claude API* | [applivo.in](#) 2026 – Present
Architected and deployed a distributed agentic AI backend using FastAPI with full async support; designed stateless REST API services orchestrating concurrent LLM inference with hot-swap between OpenAI and Claude APIs. Containerised with Docker, tested all endpoints via Postman and pytest, and iterated through Scrum-style deploy-feedback cycles with complete backend ownership.

DigiVerify AI | *Python, Flask, MySQL, REST APIs, Blockchain* | [digiverify-ai-6.onrender.com](#) | [GitHub](#) 2026
Built a production Flask backend with RESTful APIs to detect fraudulent social security beneficiaries using real-time AI; integrated blockchain for tamper-proof audit trails and MySQL for structured data storage. Designed clean backend architecture supporting dual portals (admin + citizen) with JWT-style auth and CRUD operations.

Skin Disease Classifier | *Python, TensorFlow, CNN, OpenCV, Docker, REST API* | [GitHub](#) 2025
Trained a 7-class CNN on 3,000+ dermoscopic images achieving ~90% test accuracy; containerised the inference stack as a scalable REST API endpoint with an automated pytest suite covering key inference paths.

Old Age Home Management System | *Python, Web Backend, JWT Auth, CRUD, SQL* | [GitHub](#) 2025
Developed a full-stack backend with JWT authentication, role-based access, and complete CRUD operations over SQL; adopted in production by an NGO with a second branch deployment requested post-launch.

OrbitXOS – AI Business Dashboard | *React, Vite, Tailwind CSS, REST API Integration* | [GitHub](#) 2025
Built real-time AI output visualisation consuming backend REST APIs; handled frontend-backend integration, async data fetching, and cross-browser compatibility through iterative testing.

ACHIEVEMENTS & HACKATHONS

- **1st Place – CARE HACK'26:** Won Rs. 30,000 + full internship offer at Vdart (200+ participants).
- **Amazon ML Challenge 2024:** Ranked 62 / 6,223 – Top 1% nationally.
- **1st Place – Algo Vault (YUVA National Techfest, SRMIST):** Built autonomous robot with obstacle avoidance, Bluetooth control, and voice commands.

EDUCATION

SRM Institute of Science and Technology (SRMIST) 2023 – 2027
B.Tech – Computer Science & Engineering (AI & ML) | CGPA: 8.21/10 Tiruchirappalli, India
Amrita Vidyalayam Graduated 2023
Higher Secondary – Mathematics & Computer Science | JEE Mains: 95.99 Percentile

CERTIFICATIONS

Intro to Networking – NVIDIA | ML for All – Univ. of London | Intro to AI – IBM | Data Fundamentals – Google | Python – HackerRank | Accenture Developer & Technology Simulation – Forage
